

Cover Mesh 330 & 460 is a premium quality yarn coated PVC mesh which is ideal for a wide range of coverage and protection applications including retractable truck covers, caravan and camping products as well as stone guards & sand pit covers. It is soft and flexible with excellent stay flat properties, is easy to sew & weld & has excellent strength & yarn adhesion within the weave. 130i has been specifically designed to restrict sand flies and smaller insects from passing through while 170i is a traditional insect mesh to keep out the majority of insects.

## Product information

Composition: 35 % Polyester / 65 % PVC

## Certifications

## Stock Availability

Roll Widths (mm): 3.05 meter wide

## Weight

• 330 gsm +/-

## Printing

## Durability

## Basic Physical Data

Weight: 330 gsm +/-  
Composition: 35 % Polyester / 65 % PVC

## Eco Response

## Thermal Data

 **Physical Characteristics**

**Tearing Strength** 200 N Warp 200 N weft  
**Flame Retardant** Class 1 (California Tech Bulletin No. 117-2000)  
**Weight** 330 gsm +/-  
**Tensile Strength** 1800 N Warp 1800 Weft (ISO 13934-1:1999)  
**Elongation at Break** 18.5 % Warp 17.3 % Weft (ISO 13937-2:2000)
